BMA Safe Working Handbook Updated

As part of the GP Collective actions of 25 contacts, this handbook gives a wide range of useful advice, workflow analysis and planning guidance on how to help your practice implement this safe working, move towards 25 contact limit and to protect you and your patients.

We would highly recommend you and your practice team review this comprehensive handbook and discuss how you want to implement changes in your practice.

We can discuss this part of collective action at the next LMC GP Collective action webinar shortly to be available to book.

As we have a specific Lincolnshire set of Template letters for breeches, we would recommend that you continue to use those rather than the ones included in this BMA Handbook.

Collective Action Tracker Survey

GPC England are gathering data on any actions that practices across England are taking, and from 16 September, surveys will be sent monthly. They will share the survey with LMCs to distribute to practices and they will be contacting partner members directly to ask Practices to input data per practice.

They want to hear about the actions you are doing, or considering so please do reply when you receive the survey during the ***week commencing 16 September***.

Responses from practices helps them to monitor how collective action is progressing across the country, supporting their negotiations and work towards a GP contract that is fit for purpose. The data is just for them and will not be shared outside of the BMA.
